Subject: Toluene Tank 80-13
Date: Sunday, April 14, 2019 11:38:19 AM

Regarding the ITC incident on March 17th, we have no reason to believe based on visual inspections, that any material was released from tank 80-13 during the incident. In addition, the material in 80-13 following the incident was only transferred to tank 80-18. In addition, we have no reason to believe that toluene has been released from tank 80-18.
